How to Use This Checklist

Success in a shop is not one big decision — it's small habits repeated every day. Print the next two pages and pin them near your till. Tick the boxes as you go. Within a month, the routine becomes automatic — and your numbers will show it.

THE 2-MINUTE RULE

Each daily task takes 2 minutes or less. The whole daily routine costs you under 15 minutes — and saves you thousands of shillings in losses, stockouts and forgotten deni.

DAILY ROUTINE

Morning — Before You Open

Done	Task
	Count your float (opening cash) and write it down
	Quick shelf scan: anything expired or damaged? Remove it now
	Check yesterday's low-stock alerts in the Inventory sheet — plan today's restock
	Post your morning WhatsApp Status (today's deal, with price)
	Clean the counter and entrance — customers judge before they buy

During the Day

Done	Task
	Record every sale in Daily Sales as it happens (or keep a paper slip and enter at lunch)
	Write down every deni immediately — no exceptions
	New stock arriving? Enter it in Inventory (quantity, cost, expiry) and shelve it FIFO — new behind old
	Make the natural suggestion at least 10 times: "Unataka ... pia?"

Evening — Before You Close

Done	Task
	Enter any sales still on paper into Daily Sales
	Record today's Money In / Money Out in the Cash Flow sheet
	Count the drawer — does it match the sheet? Investigate any gap today, not tomorrow
	Note tomorrow's restock list from the red alerts
	Post your evening WhatsApp Status

WEEKLY ROUTINE (pick one fixed day, e.g. Sunday)

Done	Task
	Open the Profit Report — read this week's revenue, cost and profit out loud
	Check Best Sellers: are your top 5 fully stocked for the coming week?
	Review deni list — send polite M-Pesa reminders to anyone over 7 days
	Send your weekly WhatsApp broadcast offer
	Spot-check 10 random products: does shelf quantity match the Inventory sheet?
	Pay yourself your fixed salary — record it in Cash Flow

MONTHLY ROUTINE (first weekend of the month)

Done	Task
	Open the Monthly Report — compare this month vs last month: revenue, profit, margin
	Full stock count — correct the Inventory sheet to match reality
	Margin check: find your 3 weakest products and fix price, supplier, or drop them
	Identify slow movers (60+ days) — bundle, discount or clear them
	Price-check your top 5 products with at least one other wholesaler
	Review supplier debts (Suppliers sheet) — plan payments before due dates
	Set ONE goal for next month and write it at the top of your Dashboard

THE GOLDEN HABIT

If you only keep ONE habit from this checklist, keep this: record every sale, every day. Every other improvement in your business starts from knowing your real numbers.
